A UNIQUE PARTNER FROM INSTALLATION TO MAINTENANCE

INOXMECC Service is the Group's division specialized in the maintenance of all types of valves.

More than 60 years of experience in the industrial sector, have allowed INOXMECC to develop a technical know-how to ensure rapid identification of the required spare parts and also provide specific technical advice aimed at guiding the customer in choosing the most suitable solution.

Moreover, thanks to an internal machine workshop, which counts more than 100 CNC machines, the company is able to supply a wide range of industrial components and a continuous improvement in the supply of products and services, in terms of price, quality and time.

INOXMECC Service teams have a wealth of knowledge and experience in utilising and developing innovative techniques to provide cost effective solutions to valve and pipe line related problems in the Power, Water and Oil & Gas sectors.
